ING FLYING LITTLE BI*CH!!!

GO BUY IT. I love turning that awful mix match of colors into a nice dull Grey. A top-down shooter with unique graphics and objective-based gameplay. A decent game, but not one I would buy outside of the third Humble Indie Bundle--nothing terribly spectacular or novel in this crowded game marketplace.. Don't Like It!. got stuck in the first level... This is definitely an early generation game that does a lot to show what VR is capable of, but is not in the top tier.. DEXED has a lot going for it, awesome art direction and the gameplay is quite fun. You basically have two 'guns', ice and fire and have to target enemies according to the elements. Fire beats ice mobs, ice beats fire mobs. I cannot stress enough how nice the art is in this game, the environments are breathtaking and easy on the mind and not motion sickness inducing.

As with a lot of VR games the game is rather short, but this game has a lot of replayability and the pricing is fair and half that of many other games that are more tech demos over this polished product.

I do recommend this game because it does not entirely focus on the novelty of VR but offers an interesting take on gameplay and what the Vive controllers can do.. It's a basic but very enjoyable and fun indie-game with some strategy elements and appears to be fun with friends for some casual gaming.

Although, it lacks any sense of progression, it's still quite fun and sucks you in to the extent that you just lose track of how much time you've played.

It may not be everyone's thing, but I highly recommend checking it out.

However, I do have an issue with the \$9.99 dollar price tag; at most, it should be for \$5.00 dollars because it's not particularly feature rich, and not a whole lot of people even bother with playing online with the game, if any at all.

It's a dead game in terms of updates; however, this doesn't mean the game is buggy, it seems to be fairly polished with the exception of weird AI behavior at times and the fact that the game can be easy sauce when using simple strategies such as only holding a few planets and "upgrading" them and amassing a ton of ships just to roflstomp your enemies.. Difficulty curve starts off too high, not enough reward to justify the risk, and bad AI management make this too stressful to be really worth it. Where do i even begin to elaborate?

-Right away, you'll notice on the first level, the "dad" comes in several times from the same spot and spots open up way too frequently. There is no difficulty settings or ramp up, the only changes are a few new spots for the "dad" to come in through with the frequency staying the same. You'll spend more time stressing over false positives than actually progressing. And lets mention how the first level bricks take 3 hits to break. Go ahead, take a look at the screen shot and count the number of bricks covering the picture, i'll wait. And it only gets worse from there!

-The basic frame of the game is you try to break blocks and expose pictures of PG13-at-worst anime girls and if you get caught you lose EVERYTHING. If you quit after a day you save the pictures you've unlocked up to that point and have to start all over, but with the aforementioned difficulty being so high, you'll likely never get past the 3rd level before the paranoia causes you to lose focus. If there were some way to get value out of the pictures you have to pass again and again to reach new ground, it would be worth it. but as it stands, the risk isnt worth the reward.

-Absolutely nothing is explained in enough detail with this game's mechanics outside of "break blocks, dont get caught." It's never explained what the clock timer is for, what the stars mean, or if there are bad things to do that would increase the difficulty. all of that is guess work and what you have to go to the discussion forums for. Unacceptable!

-To expand on a few earlier points it takes a long time to break all of the blocks on even the first screen, so you'll have to invest in an auto-clicker program to avoid breaking your mouse. And the details of the game are incredibly deceptive, nearing false advertising boundaries. nothing in this game is "censored", none of the pictures have anything exposed and there isn't even an external patch to expose more.

-Speaking of developers, it seems like the dev of this particular "game" has just dumped this off and left. there is no support on the discussion boards from the devs or any sort of interaction.

In closing, This sad excuse of a rip-off of Gamer form Wario Ware is nothing special. Don't let the "overall positive" reviews confuse you, there are a lot of thirsty 13 year olds who will give good reviews on the promise of anime porn. It's not even close to semi-roguelike and being "frantic" is not a good thing.. Wow didn't had that much fun since a long time for a small game like this WOW!!! GOOD JOB GUYS!!! For that price...1\$ I would of buy it at 5\$ to know how much fun I would have with it. With a some friends at home, it's the perfect game to laugh and have fun. Again, one of the best buy i did for a long time!. Everyone remembers a time when Games were 8 to 16 bit, and were unforgivingly brutal.

I recommend you pick up this game, as it fits the price and has some challenge at the end.

It's a whole new game. The mod developers did an outstanding job with the game.. Nice game for persons who like to shoot. It reminds me of the good old times.

This is the perfect thing to have some fun.

Girls are great!. this game is a gem. Controllers cannot be held inward facing for realistic grip (e.g. The Thrill of the Fight, Knockout League, BOXVR, Virtual Fighting Championship, The Fastest Fist, etc).

Unfortunately, it ruins the game for me. I just cannot punch the way the controller alignment forces me to. It feels completely unnatural... more like slapping than punching and generally uncomfortable and awkward to grasp.

Here's another way of describing it. In the neutral position, in order to make a closed fist with my hand, I have to grip the controller near to the bottom (small hands) and this makes the controller top heavy and also misaligns the gloves to my hands. Controllers facing each other I can close my hands ergonomically around the wand just below the ring, with my thumb above the trigger. Punching really feels like punching held in this manner.

While most of these other games, use the inwards-facing profile as the default, BOXVR and TToF allow you to create a custom setting where you can "insert" your hand into the glove the way you prefer to hold it and it will bind itself to that orientation.

I'll be waiting to buy this - by all accounts - excellent boxing game until either more controller profile settings are added or until Knuckles controllers come out (which presumably will work better for this game anyways).. Lives up to the original netstorm feel. Looking forward to seeing this game be completed.. Great Game, I love the environment Music for this piece of gold! anyway, Thanks for the Music, I bought the Soundtrack too and I love it!

Best Regards from Colombia! ^^ ;)

. A very charming RPG-Adventure hybrid in the style of Quest for Glory, radiating waves of nostalgia. Some of the rooms V screens are downright beautiful, such as the first chamber of the island castle.

Story rich with really fun, clever puzzles. Iu2019m enjoying it a lot!

. This is a pretty game, based on the Polish pilots in the UK in the war years, good game play & great graphics. As an early access game it has a lot of potential. Grab it now while its at a cheap introductory price. I look forward to seeing what direction the game takes us. It needs full flight controller support to just improve the flight control in the dog fights
